

Retailer-centred multi-banking solution

AMoneyPAY is Argentea's Retailer-centred solution, ideal for having full control on the administration of all electronic incomes. AMoneyPAY integrates flawlessly with the main cash-register and POS terminals softwares, allowing management and independent monitoring of the income of all retail stores, to then redirect them simply to the designated banking institutions.

AMONEYPAY WILL:

- ▶ Allow you to choose which bank to send your proceeds to, in complete autonomy, according to your needs. Take advantage of the commissions' earning potential.
- ▶ Check real time transactions and statistics on incoming flows, via web.
- ▶ Interact directly with operators of international payment circuits (Visa, Mastercard, ecc) allowing negotiations agreements.
- ▶ Work in complete security and continuity, thanks to Argentea's certified hosted backup Datacenter.
- ▶ Establish innovative service payments for your customers, with a tailor-made system based on your needs. alle vostre esigenze.
- ▶ Rely on our guaranteed customer service, available 7 days a week.

ARGENTEA IS CERTIFIED

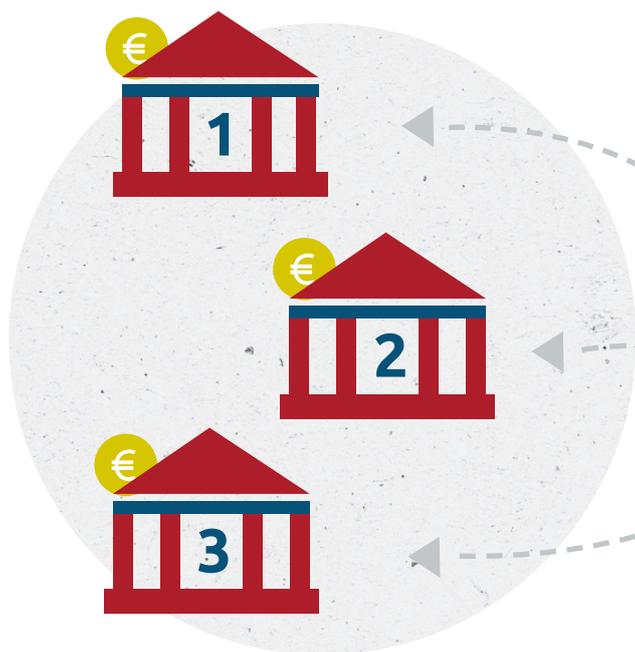

UNI EN ISO 9001:2009 (società DNV).
Coban 405010 Microcircuito - Protocollo CB2

HOW AMONEYPAY WORKS

1. POS terminals receive the amount from the cash-register.
2. The card is then inserted into the POS.
3. The POS terminal queries the server for which bank to execute payment on.
4. The AMoney server, based on the user's settings, selects the appropriate bank to execute the transaction and forwards the termId to the POS in use.
5. The POS then activates the received termId and sends the payment request to the selected bank.
6. The bank then sends the payment outcome notification back to the POS.

AMONEYPAY SECURITY

- ▶ **The payment phase** bypasses mediation of any software-side applications, avoiding risks of blockage.
- ▶ **Possibility to activate a backup** procedure on Argentea's secondary datacenter, also certified and geographically distant from the main.

- ▶ **Argentea offers first-level Help desk** service.
- ▶ **Argentea offers highly specialized technical support** to handle complex banking and cross-banking problems.
- ▶ **Any payment-related issues**, even directly linked to the bank or specific national authorization centres, is taken care of directly by Argentea.
- ▶ **Argentea offers application** and architecture availability services.
